Dahlia Campanulata	Tree Dahlia	Weeping Tree Dahlia	Now		lavender	Sep or Oct	Dahlia campanulata (Weeping Tree Dahlia) is a recently discovered tree Dahlia from Oaxaca, Mexico. It reaches a height of 8 feet (or more) with beautiful pendulous bell shaped lavender flowers that are about 4 inches across. Tree Dahlias, as a group, are the giant cousin of the garden Dahlia and can reach heights of 20 feet. In the garden, tree Dahlias provide an interesting foliage effect with towering height and bamboo-like stems. Protect from wind. After blooming cut to ground/ 6".	9	8'-10'	5'	ave	Sun
Dahlia Imperialis	Tree Dahlia Bluebell	Caerulea	Now		blue	Sep or Oct	As beautiful as it is rare, this is a pale blue form of the fabulous native Mexican tree dahlia. An impressive species, it reaches heights in excess of 8' in a single season, and to ensure successful flowering it needs to be grown in rich, well-drained soil, in a situation protected from frost. The enormous 6 to 8 inch flower blooms in Sept or Oct, but before then it makes an absolutely stunning foliage plant with finely cut leaves in abundance covering the unusual bamboo-like stems. Protect from wind. After blooming cut to ground/ 6".	8	8'	5'	ave	Sun
Dahlia Imperialis	Bell Tree Dahlia		Now		Lavender-pink	Sep or Oct	Very rare - huge dahlia that gets to 8' or even 12'+. Loads of 5" lavender-pink blooms on panicles 3' wide per stalk. Blooms in fall and must be staked and protected from high wind. Cut stalk to 6" after blooming. Protect from wind. After blooming cut to ground/ 6".	8	8-10'	5'	ave	Sun
